

ABSTRACT OF THE DISCLOSURE

Systems and methods are disclosed for transacting business between a solicitor and a business. The system includes a server used by a business. The server is accessible by a solicitor. An evaluator is housed on the server. The evaluator receives input data by the solicitor and determines at a first stage whether the input data is complete to receive further evaluation, and at a second stage whether the input data as a whole falls within one or more specific pathways of further data evaluation.
